

Washer/Pretreatment Systems

INDUSTRIAL WASHER / PRETREATMENT SYSTEMS

AIS Finishing Systems manufactures a wide variety of industrial pretreatment washes to prepare your products for painting, phosphating, rust prevention, and specialty finishing processes. At AIS, our focus is on building long-lasting, stainless-steel washers that are built to the top-industry standards and that will maintain peak performance while always looking good. A poly or steel washer have a limited lifespan and will lose performance and aesthetic appearance over time.

AIS will work with your chemical and coating suppliers in order to provide you the correct washer design to include; number of stages, heating systems, drain-zone lengths, halo and counter-flowing rinses, and spray or immersion tanks to meet your requirements.

Types:

- Monorail Spray Washers
- Immersion Washers
- Combination Spray / Immersion
- Indexing Washers
- Belt Washers
- Specialty Washers

Standard Features

All Stainless-Steel Tank and Housing Construction * Double-welded Tanks * Stainless-Steel Conveyor Guards or Split-Top Construction * Access Doors and Platforms Between each Stage * Accessible Pump Weirs * Water Conservation Design * Preassembled and Tested.
